

• **VICE CLAMP S-VICE** 13,90

The Tubeology system is designed for fly tyers. With its collar designed at the front to stop your thread from slipping off the head and to angle your wings. The Tubeology Vice Clamp caters for the keys requirements for metal Tube Fly tying: the vice clamp makes sure the tube does not rotate; the vice clamp is sturdy with the ability to hold the tube without wobble in your vice. This enables you to pull on the tying thread without everything giving. The Tubeology Vice Clamp allows you to add on the hook retainer to help you tie the correct length hairwing and materials to your fly.

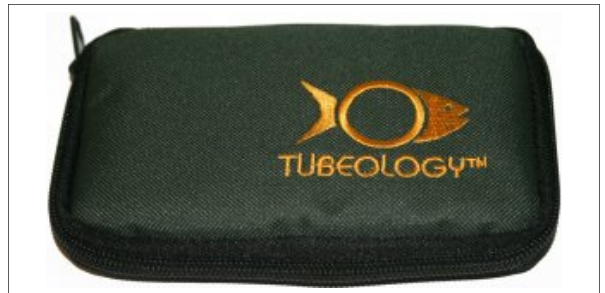

• **TUBE FLY STORAGE SYSTEM S-STORAGE** 35,40

Key to the Tubeology Storage System is its' practicality, with 3 rows of 24 elastic loops designed to hold your tube flies the bag holds 72 tube flies ready to use. However it does not stop there, with 10 grip seal resealable plastic pockets for additional tubes, tube flies, spinner blades, liners or other components that you may require and 4 mesh zipper pockets to contain packets of hooks or other accessories this is the perfect tube fly storage bag. No silly metal rods as per many tube fly storage systems this is functional, practical and ideal at the water edge.

• **NANO TUBE FLY STORAGE SYSTEM S-NANO** 23,70

The Tubeology Storage System has been bespoke designed for tube flies. It is made from rugged Polyester 600D material and has beautiful gold coloured embroidery making it a thing of beauty. This is the same size as a standard fly box. Key to the Tubeology Nano Storage System is its' practicality, with 4 rows of 12 elastic loops designed to hold your tube flies the bag holds 48 tube flies ready to use. However it does not stop there, with a mesh zipper pockets to contain packets of hooks or other accessories this is the perfect tube fly storage bag. No silly metal rods as per many tube fly storage systems this is functional, practical and ideal at the water edge.

• **ALUMINIUM TUBES SMALL 20 MM - 25 MM - 31 MM S-ATUBE-S** 8,30

• **ALUMINIUM TUBES SMALL 38 MM - 50 MM S-ATUBE-L** 8,30

- **FLUORESCENT ORANGE CONEHEADS - BRASS & ALUMINIUM S-FO-CONE** 8,30
- **FLUORESCENT PINK CONEHEADS - BRASS & ALUMINIUM S-FP-CONE** 8,30
- **FLUORESCENT YELLOW CONEHEADS - BRASS & ALUMINIUM S-FY-CONE** 8,30

Replacement coneheads can be purchased for any of your Tubeology systems or as add-ons to an existing system. This pack contains 9 heads brass and aluminium. It has one of each size in the pack.

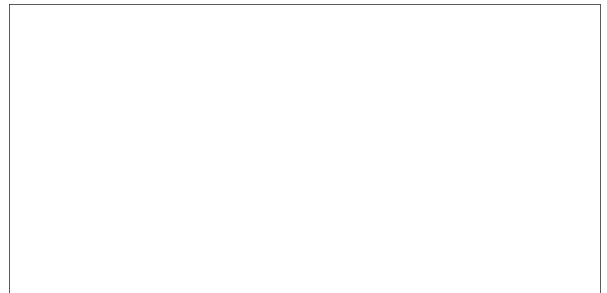

- **FLYING C SPARE TUBING S-C-TUBING** 6,00

Replacement Flying C Tubing can be purchased for any of your Tubeology systems or as add-ons to an existing system. Or Flying C Tubing can be cut to any length to create any length Flying C's that you like. Supplied in 60cm lengths with red, black and yellow in each pack.

- **TUBE LINER S-LINER** 4,20

Replacement liner tubing is supplied in 1m lengths, the tube liner is necessary to protect the tubes and leader and protect from potential fraying. Simply slide into the tube prior to use. We do not recommend that this is burned in place as do other tube fly manufacturers as this could restrict swapping of heads. Simply cut to length slightly longer than the tube and heads for use.

- **HOOK RETAINER LUMINOUS S-HOOKR-L** 4,20
- **HOOK RETAINER CLEAR S-HOOKR-C** 2,40

Replacement Hook Retainer tubing is supplied in 1m lengths, it is available in clear or luminous material. The luminous hook retainer can also be used as snake bodies.

- **INLINE WEIGHTS S-INWEIGHT** 7,10

Replacement Inline Weights 3 x 5g & 3 x 10g can be purchased for any of your Tubeology systems or as add-ons to an existing system. The Inline Weights can be screwed inbetween any of the major Tubeology components to add weight to a lure.

- **PREDATOR HAIR Y-HAIR** 5,90

Good winging material is essential with larger predators like Pike / Muskie, Bass etc. Our Predator hair is extremely fine synthetic winging which moves well with tube flies. In lengths of approximately 8" there is ample winging to tie many tube flies. In colours specifically for predatory fish this synthetic winging material can be used in fresh or salt water.

• **SANDY'S SNAKE FLIES T-SNAKE**

24,40

The Tubeology system is designed for fly tyers. With its collar designed at the front to stop your thread from slipping off the head and to angle your wings. The Tubeology Vice Clamp caters for the keys requirements for metal Tube Fly tying: the vice clamp makes sure the tube does not rotate. The vice clamp is sturdy with the ability to hold the tube without wobble in your vice. This enables you to pull on the tying thread without everything giving. The Tubeology Tube Vice Clamp allows you to add on the hook retainer to help you tie the correct length hairwing and materials to your fly.
